NO-GO / LIMITATIONS	

5 COORDINATION - TRAINED RESCUERS ONLY

1. Report the fall, stop nearby work, summon designated rescuers, and activate EMS.
2. Confirm worker position and condition; protect responders and control the area.
3. Follow the identified FULL technical procedure; use only verified equipment.
4. If primary method is unusable, activate the verified backup. Do not improvise rigging.
5. Tell EMS about consciousness, known injuries, and estimated suspension duration.

NOT A TECHNICAL RESCUE PROCEDURE. The supervisor must check and sign this card before posting.

Use short references. Keep detailed rescue instructions in the FULL plan at the location shown above.
